Neplali ●●●●●

Interests

Scalable system design, modular UI development, team-driven execution, workflow optimization, and exploring blockchain architecture for future decentralized applications.

Projects

(2024 – Present)
Laravel Development Projects

JobSansar: toptenvault.xyz ↗ is a full-featured job networking platform built from the ground up to serve Nepal's employment ecosystem. Designed and developed entirely by me, it empowers job seekers and recruiters to connect, communicate, and collaborate in real time. Core features include job discovery, recruiter messaging, profile-based matching, and ad placement—all wrapped in a clean, responsive UI.

Fit-future: Contributed to the backend of *Fit-Future*, handling relationship modeling and setting up API endpoints for structured data flow.

Scrap Daddy: Laravel-based data scraper for live stock prices, crypto airdrops, and campaign tracking via APIs.

TMS (Task Management System): Modular task manager with role-based assignments, deadlines, progress tracking, and team collaboration tools.

HRM (Human Resource Manager): Employee lifecycle manager with attendance, leave, payroll, and secure role-based access all built in Laravel.

WordPress Projects

InfiOutdoor.com ↗ : A custom WordPress site for a travel and adventure brand, built entirely from scratch using Elementor, Advanced Custom Fields (ACF), and bespoke plugins. Features include modular layouts, dynamic content zones, and flexible backend fields for managing galleries, trip metadata, and promotional assets.

Freelance WordPress Work Delivered a wide range of client projects—from business websites to eCommerce platforms—using Elementor, ACF, and custom plugins. Each build was responsive, SEO-optimized, and tailored for dynamic content and clean admin workflows.

Front-End Development Projects

Empowered Man Designed and developed a responsive, user-friendly signup/login flow with modern UI principles, ensuring seamless mobile and desktop experience. The platform is currently live.

Fit-Future Created a complete front-end interface for a fitness platform, including layout, styling, and interactive elements using HTML, CSS, and JavaScript.

Professional Experience

Developer
Uno technology
02/2025 | Kathmandu
Got in as an intern and Led frontend design and development for *Fit-Future* and *Empowered Man*, delivering responsive layouts and modern interfaces. Also contributed to backend integration for *Fit-Future*, ensuring smooth API connectivity and data flow.

Freelancer
Wordpress Freelancing
2025 – Present | Kathmandu
I have independently completed various freelancing projects, including travel and tours websites and e-commerce platforms on WordPress, focusing on custom development, SEO optimization, and delivering user-friendly, high-performing solutions.
